### Cisco Packet Tracer 8.2.2 release info

Cisco Packet Tracer 8.2 has been released in summer 2022 and is now available for download on Netacad website. Check [Packet Tracer 8.2 new features](#). Packet tracer 8.2 adds a new OSPF command (**show ip ospf interface brief**) to the Packet Tracer 8.x serie, which added a new Packet Tracer Tutored Activities (PTTA) engine, as well as bug fixing and improvements on accessibility, usability, and security. The main new feature of Packet Tracer 8.x is the addition a new SDN Network Controller allowing emulated network programming through API exposed by Packet Tracer to the host. It is distributed as a debian package (.deb) for Ubuntu 20.04 and 22.04 LTS.

Cisco Packet Tracer 8.2 is created by Cisco Systems<sup>TM</sup> and is provided for free to everyone. Self learners are able to download Cisco Packet Tracer after registering on Cisco Netacad website. This is a major change in Cisco delivery policy for Packet Tracer as previous versions were only available for Netacad students and instructors.
